The Condition of College & Career Readiness

This report looks at the achievement of the ACT®-tested 2017 graduating class relative to college and career readiness. A total of 60% of students in the 2017 US graduating class took the ACT® test, compared to 64% last year, 54% in 2013, and 42% in 2007. The growing percentage of the nation’s graduates taking the ACT over the past decade has enhanced the breadth and depth of the data pool, providing a comprehensive picture of the current graduating class in the context of college readiness.

As a research-based nonprofit organization, ACT is committed to providing information and solutions to support the following:

- **Holistic view of readiness.**
  The ACT report, *Broadening the Definition of College and Career Readiness: A Holistic Approach*, shows academic readiness is only one of multiple domains critical in determining an individual’s readiness for success in college and career. Social and emotional learning skills (SEL) are also vital. Behavioral skills, cross-cutting capabilities, and navigational skills should be measured and addressed. Together, these elements provide a comprehensive picture of student readiness for success after high school.

- **Meaningful data for better decisions.** ACT is focused on providing better data to students, parents, schools, districts, and states so that all can make more informed decisions to improve educational outcomes. We accomplish this goal by taking a holistic view and using consistent and reliable historical information so that individuals and institutions have a better context to make critical decisions about the journey they have undertaken.

Rhode Island Key Findings

**Performance**

- In the Rhode Island graduating class of 2017, 2,121 graduates took the ACT® test, compared to 1,612 in 2013.
  - In Rhode Island, 21 percent of 2017 graduates took the ACT, compared to 60 percent nationally.
  - Rhode Island graduates of 2017 had an average Composite score of 24.0, compared to the national average of 21.0.
  - Compared to the 2017 Rhode Island graduating class Composite average of 24.0, Rhode Island graduates in 2016 and 2013 had Composite averages of 23.3 and 22.7, respectively.
  - In the 2017 graduating class, the average ACT score increased in English, math, reading and science, compared to last year.
- In 2017, 46 percent of Rhode Island graduates met all four ACT College Readiness Benchmarks. This compares to 42 and 39 percent of 2016 and 2013 graduates, respectively.
  - In the 2017 graduating class, the percent of students meeting ACT College Readiness Benchmarks increased in English, math, reading and science, compared to last year.
  - In the 2017 graduating class, the percent of students meeting all four benchmarks increased by 7 percent over the last five years.

**STEM**

- In 2017, 1,132 Rhode Island graduates (53 percent) indicated having an interest in STEM majors and/or careers.
  - Compared to a 2017 Rhode Island graduating class STEM average of 23.6, graduates in 2016 and 2015 had STEM averages of 23.1 and 22.4, respectively.
  - Compared to 38 percent of 2017 Rhode Island graduates meeting the ACT STEM College Readiness Benchmark, graduates in 2016 and 2013 had STEM Benchmark percentages of 34 and 28, respectively.
  - In contrast to the national graduating class’s flat profile, Rhode Island graduates meeting the ACT STEM College Readiness Benchmark have demonstrated an increase in average math scores since 2015.
  - The ACT is the only college entrance exam with a dedicated Science assessment, making the ACT a great fit for the Rhode Island STEM Connect program.

**Career Readiness**

- In 2017, 1,001 Rhode Island graduates (47 percent) were likely to attain the Gold ACT WorkKeys® National Career Readiness Certificate® or higher based upon ACT Composite score, compared to 538,392 (27 percent) nationally.
  - The ACT Composite scores associated with a 50% chance of earning each ACT WorkKeys NCRC® level or higher are: 13 for Bronze, 17 for Silver, 25 for Gold, and 35 for Platinum. Based on those cut scores, students who earned an ACT Composite score of less than 13 would be classified as “Needs Improvement;” 13 to 16 as “Bronze;” 17 to 24 as “Silver,” and 25 or above as “Gold or Higher.” For comparison, individual student score reports classify those who scored 12 to 13, 14 to 17, and 18 and higher as making progress toward Bronze, Silver, and Gold certificates.
Impact

- Based on the actual test volume and ACT score distributions of 2016 ACT-tested Rhode Island high school graduates, ACT research estimates that an increase of 0.1 in state average ACT Composite score for the 2017 graduating class would result in:
  - 4 more students enrolling in college.
  - 5 more students persisting to year two.
  - 3 fewer students needing remedial English.
  - 5 fewer students needing remedial math.
  - 5 more students persisting to year four.
  - 6 more students earning a postsecondary degree within six years.

Behaviors that Impact Access and Opportunity

- In Rhode Island, 2017 graduates taking the ACT two or more times had an average Composite score of 25.1, compared to 23.2 for single-time testers.
  - 41 percent (871) of 2017 Rhode Island graduates took the ACT more than once, compared to 45 percent nationally.
- Of Rhode Island’s 2017 graduating class, there were 1,431 (67 percent) White students taking the ACT. This compares to 1,062,439 (52 percent) nationally.
- Of Rhode Island’s 2017 graduating class, there were 221 (10 percent) Hispanic students taking the ACT. This compares to 347,906 (17 percent) nationally.
- Of Rhode Island’s 2017 graduating class, there were 90 (4 percent) African American students taking the ACT. This compares to 96,097 (5 percent) nationally.
- Of Rhode Island’s 2017 graduating class, there were 107 (5 percent) Asian students taking the ACT. This compares to 96,097 (5 percent) nationally.
- For Rhode Island’s 2017 ACT-tested graduates, the top five schools to which scores were sent were University of Rhode Island, Rhode Island College, Brown University, Boston University, and Northeastern University.
  - For Rhode Island’s 2017 ACT-tested graduates, the top three out-of-state schools to which scores were sent were Boston University, Northeastern University, and University of Connecticut.
- Compared to 73 percent of 2017 graduates nationally, 62 percent of Rhode Island graduates opted into EOS.
  - Compared to 85 percent of African American students nationally, 82 percent of Rhode Island African American 2017 graduates opted into EOS.
  - Compared to 76 percent of Asian students nationally, 69 percent of Rhode Island Asian 2017 graduates opted into EOS.
  - Compared to 83 percent of Hispanic students nationally, 76 percent of Rhode Island Hispanic 2017 graduates opted into EOS.
  - Compared to 69 percent of White students nationally, 60 percent of Rhode Island White 2017 graduates opted into EOS.
- The ACT “Get Your Name in the Game” initiative allows colleges and universities access to underserved students’ names free of charge. Four colleges and universities in Rhode Island acquired 58,965 students’ names using “Get Your Name in the Game.”

- ACT issued 538 ACT fee waivers to qualified Rhode Island students. However, 167 students (31 percent) did not take advantage of this opportunity to test for free. This compares to 656,061 issued nationally, of which 181,092 (28 percent) did not take advantage. This represents a great opportunity for high schools within the state to increase the socio-economic diversity of their students tested. Note: This is the number of fee waivers issued for the state, not specific to this graduating class.

Pipeline

- In the Rhode Island graduating class of 2017, 144 (7 percent) had parents who did not attend college.
- In the Rhode Island graduating class of 2017, 536 (25 percent) aspired to attain a professional degree. They had an average Composite score of 25.6.
- In the Rhode Island graduating class of 2017, 548 (26 percent) aspired to attain a graduate degree. They had an average Composite score of 25.3.
- In the Rhode Island graduating class of 2017, 688 (32 percent) aspired to attain a bachelor’s degree. They had an average Composite score of 21.9.
- In the Rhode Island graduating class of 2017, 8 (0 percent) aspired to attain an associate’s degree. They had an average Composite score of 15.8.
- In order of prevalence, the five most commonly indicated college majors of interest for 2017 Rhode Island graduates were: Undecided; Medicine (Pre-Medicine); Nursing, Registered (BS/RN); Business Administration and Management, General; and Biology, General.
  - In the Rhode Island graduating class of 2017, 482 (23 percent) indicated being undecided about their college major. They had an average Composite score of 24.9.
  - In the Rhode Island graduating class of 2017, 60 (3 percent) indicated planning on majoring in education. They had an average Composite score of 20.1.

ACT Footprint

- Number of administrations:
  - PreACT: 132
  - ACT WorkKeys: 134

Additional Points

- According to the US Department of Labor, the top four emerging professions in Rhode Island include: Statisticians, Riggers, Operations Research Analysts, and Actuaries.
- ACT will host an ACT College and Career Readiness Workshop on October 2 at Johnson & Wales University. The theme for this year’s workshop is “Preparing Students for Success: A Holistic Approach.”
- In the 2017 Rhode Island graduating class, five students earned a 36 Composite score on the ACT. This compares to 0 students in 2016.

Percent of 2017 ACT-Tested High School Graduates by Educational Aspirations

Note: Percents in this graph may not sum to 100% due to rounding.

There is good news in that 84% of Rhode Island’s 2017 ACT-tested graduates aspired to postsecondary education. Interestingly enough, 85% of Rhode Island’s 2016 ACT-tested graduating class aspired to enroll in postsecondary education, compared to 82% who actually did enroll. If we fully closed the aspirational gap, an additional 66 of the 2016 ACT-tested graduates from Rhode Island would have enrolled in postsecondary education.

Rhode Island State Exemplar
2017 ACT College and Career Readiness Campaign

Youvin Chung
Barrington High School, Barrington Public Schools

“As a citizen of the world, I feel it is important to make some impact, no matter how small, to the future generations. Through my research in oncology and biochemistry, I hope to contribute my efforts to the world to assist in the advent for cancer treatment.”

Youvin has not let his struggles to be accepted for who he is by his family and community stop him from volunteering with his church and giving back to his community and to the wider world. His passion for science was not expressed solely through his success in college-level courses; Youvin also had a paper published in the National High School Journal of Science.

Youvin plans to major in biochemistry at the University of Pennsylvania, and potentially go on to graduate school, to help him meet his goal of performing research in the fields of biochemistry and oncology.

Key ACT Research

As students navigate their education and career journeys, it is critical for them to be ready for college and career success. College and career readiness is supported by the ACT Holistic Framework, a research-based, multidimensional model for understanding the essential knowledge and skills needed for success, and the solutions that can meet students’ navigation needs. Visit act.org/condition2017 to access key reports listed below.

- Serving students' navigation needs from kindergarten to career requires a holistic approach:
  - Beyond Academics: A Holistic Framework for Enhancing Education and Workplace Success
  - The Importance of Behavioral Skills and Navigation Factors for Education and Workforce Success
- The ACT Holistic Framework is supported by prolific research:
  - Core Academic Skills:
    - 2017 State and National Condition Reports
    - Profiles of STEM Students:Persisters, Joiners, Changers, and Departures
    - ACT Composite Score by Parental Education Level, 2012–2016
    - Comparisons of Student Achievement Levels by District Performance and Poverty
  - Behavioral Skills (also called Social and Emotional Learning):
    - The Development of Behavioral Performance Level Descriptors
  - Cross-Cutting Capabilities:
    - ACT National Curriculum Survey 2016
  - Student journeys continue into postsecondary education and careers:
    - Higher Education Research Digest
    - Predicted Attainment of ACT National Career Readiness Certificates for the 2016 ACT-tested High School Cohort

Recommendations

1. **Use a holistic assessment model for school accountability that measures student readiness for college and career across multiple domains.** While it is essential to measure students’ academic achievement in assessing college and career readiness, it is not enough. Social and emotional learning skills are important and measurable, and they can be impacted. Assessment models should take into account core academic skills, behavioral skills, cross-cutting capabilities, and education and career navigation skills to provide an integrated picture of college and work readiness.

2. **Make special efforts to ensure that underrepresented students have equal access and opportunity to pursue postsecondary education.** According to ACT research, most underrepresented students want to continue their education after high school, but they face many barriers. Ensuring they have access to the same rigorous core curriculum as others is just one step. Many also lack the resources, information, and familial and peer support they need to prepare for success after high school. Special efforts must be made to level the playing field for underrepresented students so they have equal opportunity to succeed.

3. **Increase emphasis on STEM readiness initiatives, measures, and programs.** With technology advancing rapidly, the importance of STEM readiness is only increasing. The threat of robotic and computer-assisted technologies eliminating jobs is growing while the remaining and emerging jobs will likely require higher-level skills. ACT data continue to show that many graduates are not ready. Without improvement in STEM readiness, far too many will be ill-prepared for the future workforce.

4. **Focus on fewer, higher, and clearer learning standards in K–12 schools.** Far too many students continue to graduate from high school without all of the core skills they will need to ably succeed at the next level. Many will struggle, and many will likely fail to realize their aspirations. The push toward raising the bar on learning standards and focusing on the essential skills necessary for success must continue.

5. **Begin assessing learning and implementing intervention strategies early.** Early assessment and intervention are critical to improving educational outcomes. If students are not on track for college and career readiness by the time they reach middle school, it may be too late. Assessing learning and implementing intervention strategies to help students get on the right path for college and career readiness must begin in elementary school.
