

# ACT National Online Practice Test 2 Scoring Key

## What's Inside

- Answer forms and scoring keys for the [ACT Online Practice tests](#)
- Instructions for calculating scale and composite scores

# How to Score the Online Practice Tests

Follow the instructions below and on the following pages to calculate your scale and composite scores on the untimed [online practice tests](#).

## Raw Scores

The number of questions you answered correctly on each test section is a raw score. Because there are many forms of the ACT, each with different questions, the difficulty level varies between the forms. A raw score of 35 on one form of the mathematics test section, for example, may be about as difficult to earn as a raw score of 37 on another form of that test section.

## Computing raw scores

To compute your raw scores, use the Answer Forms to check your answers with the scoring information in the scoring keys and conversion table, then do the following:

1. Mark a one (1) in the blank for each question answered correctly.
2. Count the number of correct answers for each of the multiple-choice test sections.
3. Add up the total number correct for each category and test section and capture it as directed beneath its scoring key.

Use the scoring key for each test to score your answer document for the sections in the practice test. Mark a “1” in the blank for each question you answered correctly and add up the total number correct for each test. Do not count correct answers for

gray cells, as those are for field test items not included in converting raw scores to scale scores. Please note, the placement of these field test questions varies across different test forms, and will NOT remain in the same test item slots each test administration.

These numbers are your raw scores on the individual multiple-choice test sections. The highest raw score for a given test section is the number of questions included on that test section:

- English: 40
- Mathematics: 41
- Reading: 27
- Science: 34

**Note:** Raw scores are also provided as part of the Summary Report for each test section taken online in TestNav.

## Scale Scores

To adjust for the small differences among different forms of the ACT test, raw scores are converted into scale scores. Scale scores appear on reports sent to your school.

When your raw scores are converted into scale scores, it becomes possible to compare your scores with those of examinees who took different test forms. For example, a scale score of 26 on the mathematics test section has the same meaning for any form of the ACT.

## Converting Raw Scores to Scale Scores

Each ACT test section generates a single scale score between 1 and 36. Use the scale score conversion table to convert your raw scores to scale scores for each test section.

## English Answer Form

English Number	Student Response			
1	A	B	C	D
2	A	B	C	D
3	A	B	C	D
4	A	B	C	D

19	21	1	3
18	21	0	1
17	20		

**Science Scale Score** = \_\_\_\_

# Calculating a Composite Score

An ACT test generates a single Composite score of 1–36. Compute the Composite score by averaging the three scale scores:

1. Add your English, Mathematics, and Reading scale scores. Enter this sum in the blanks below.
2. Divide the sum by 3. If the resulting number ends in a fraction, round it to the nearest whole number. (Round down any fraction less than one-half, except for averages lower than one; round up any fraction that is one-half or more. Also round up averages that are less than one.)
3. Enter this number in the blank below. This is your Composite score.

## Composite of scale scores

English Scale Score = \_\_\_\_  
Mathematics Scale Score = \_\_\_\_  
Reading Scale Score = \_\_\_\_  
Sum of Scale Scores = \_\_\_\_

---

Composite score  
(sum ÷ 3) = \_\_\_\_

**Note:** If you left a test section completely blank and marked no items, do not list a scale score for that section and do not calculate a Composite score.

# Next Steps

Your practice test score is an estimate of the score that you would receive during an actual administration of the ACT test. Reflecting on your practice experience can be useful as you continue to prepare for test day.

Consider the following as you review your scores as part of your general test performance:

- **Pacing:** Did you run out of time? You may need to adjust the way you use your time in responding to the questions. See [Preparing for the ACT](#) for information on pacing yourself.
- **Directions:** Did you spend too much time trying to understand the directions for the test sections? Make sure you understand them before test day.
- **Misses:** Review the questions that you missed. Did you select a response that was an incomplete answer or that did not directly respond to the question being asked? Try to figure out what you overlooked in answering the questions.
- **Types:** Did a particular type of question confuse you? In reviewing your responses, check to see whether a particular type of question was more difficult for you. Spend some time practicing those types of questions.
