About This Guide

Accessibility supports refer to systems, tools, and accommodations that remove barriers for the entire testing population, including examinees identified as having disabilities and English learners (ELs), as well as examinees who do not have a disability. All examinees need to be able to communicate fairly and effectively what they know and can do when they take a test. ACT provides accessibility supports that include the following:

- Universal supports
- Designated supports
- English learner supports
- Accommodations

This guide helps educational teams select appropriate accessibility supports and accommodations for their students for use with assessments and the WorkKeys National Career Readiness Certificate (NCRC).

Terms and Topics

Understanding the meaning of the following terms and topics you will encounter in this guide will help you better understand and appropriately implement accessibility supports and accommodations for students taking WorkKeys assessments. (See Understanding Accessibility Supports Options for definitions and examples of individual accessibility supports and accommodations, such as medical monitoring devices, screen reader compatibility, and others.)

<table>
<thead>
<tr>
<th>Accessibility supports</th>
<th>Embedded features and locally provided adjustments to the standardized testing procedures that allow for inclusive, accessible, and fair testing for diverse populations of students which include universal supports, designated supports, EL supports, and accommodations.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Accommodations</td>
<td>Adaptations to the standardized procedures available to examinees with a disability who use the same accessibility support to access instruction and assessment in their educational environment. Accommodations are intended to reduce and/or eliminate the effects of an individual examinee's disability.</td>
</tr>
<tr>
<td>Designated supports</td>
<td>Adjustments to standardized testing procedures that change the way a student accesses the test without changing the content being assessed. They are available to any examinee for whom a need has been identified as long as test security is not compromised and testing environment requirements are met. Typically, these are adjustments to the testing environment. Most require advance planning to deliver.</td>
</tr>
<tr>
<td>Disability</td>
<td>As defined by the Americans with Disabilities Act (ADA), a physical or mental impairment that substantially limits a person's ability to perform one or more major life activities when compared to most people in the general population. The ADA defines a person with a disability as a person who has such an impairment, a person with a history or record of such an</td>

<tr>
<td>impairment, or a person who is perceived by others as having such an impairment.</td>
<td></td>
</tr>
<tr>
<td>Educational team</td>
<td>A group of educators who work in collaboration with families and students to design and provide effective educational plans that provide access to the general curriculum for students with an identified need.</td>
</tr>
<tr>
<td>English learner (EL)</td>
<td>A student, enrolled in a school within the United States and its territories, who is linguistically diverse and who is identified (using their state-approved English language proficiency criteria) as having limited English proficiency. This includes students who comprehend, speak, read, or write some English, but whose predominant comprehension or speech is in a language other than English.</td>
</tr>
<tr>
<td>Examinee with a disability</td>
<td>An individual with a professionally diagnosed and documented disability that meets criteria defined in the Individuals with Disabilities Education Act of 2004 (IDEA), Section 504 of the Rehabilitation Act of 1973, or the ADA. See also disability.</td>
</tr>
</tbody>
</table>
| Formal educational plan                   | A written document developed by an educational team which documents the student's qualification and need for accessibility supports and accommodations to access the general curriculum, and states how the accommodation will be implemented during instruction and assessment. The decision made regarding accommodations should be transparent. Students may fall into one of the following formal educational plan categories:  
  - Students who are referred, evaluated, and determined to be eligible using established criteria to receive special education services under IDEA will have an **individualized education program (IEP)** developed by an IEP team  
  - Students who are served under Section 504 of the Rehabilitation Act of 1973 will have a **Section 504 plan or individual accommodation plan (IAP)**, as defined by local educational agency policy and procedure  
  - Students who are identified with limited English proficiency as defined by state guidelines may have an **English language acquisition (ELA) plan** |
| Former EL                                 | An individual who is no longer classified as an English learner, although progress will continue to be tracked for two years after they have achieved the standards of fluency as identified by an English language proficiency assessment. Former EL students are considered to be English proficient. |
| Universal supports                        | Supports embedded into standardized testing processes and procedures to support access to the test for all examinees. Also referred to as embedded supports.                                                                 |
Educational Team Decision Making

Educational teams familiar with an individual student's needs should follow a systematic and data-based selection process for identifying required accessibility supports and accommodations. Educational teams should include educators, school staff, parents/guardians, and the student. These individuals combine their knowledge, experience, and commitment to design an educational program that allows the student to access the same curriculum and instruction as their peers without disabilities. The title, function, policies, and procedures of these educational teams are defined by the local educational agency and, for some students, in accordance with state and federal law.

Educational teams have the decision-making responsibility to select appropriate accessibility supports and accommodations for instruction and assessments based on evidence provided by educational, medical, and/or mental health professionals. Various types of teams may be assembled to consider a student's educational needs. All decisions will be made and documented in a formal educational plan according to applicable local, state, and federal guidelines.

**NOTE** Accommodation decisions are made by a student's educational team. Decisions about not using accommodations on WorkKeys assessments should be referred back to the educational team and documented via an irregularity report, if approved.

All accommodations used for testing should be used routinely in instruction and evaluated periodically for effectiveness. To preserve test validity, not all instructional accommodations are allowable for use on WorkKeys assessments.

To the extent possible, ACT allows accommodations that adhere to the following principles:

- Enable examinees to participate more fully and fairly in instruction and on WorkKeys assessments to demonstrate their knowledge and skills
- Are based on an examinee's need rather than on the category of an examinee's disability
- Are based on a documented need in the instructional and assessment setting
- Are not provided for the purpose of giving the examinee an enhancement that could be viewed as an unfair advantage or to obtain a desired score
- Are described and documented in the appropriate and current formal educational plan
- Become part of the examinee's program of daily instructions as soon as possible after completion and approval of the formal educational plan
- Are not introduced for the first time during WorkKeys assessments
- Are monitored for effectiveness during daily instruction
- Are based on individual needs

The following table provides examples of possible options for accessibility supports for examinees with different impairments and disabilities.

### Testing with Accessibility Supports

Accessibility supports apply to all examinees. Although we design the standardized testing experience to be the same for all examinees, ACT does provide accommodations for examinees with diagnosed, documented disabilities and language supports for EL examinees to provide equitable access during the test without compromising the validity of test results. Accessibility supports emphasize an individualized approach to implementing assessment practices for examinees with diverse needs who participate in large-scale standardized testing.

ACT provides a list of allowable accessibility supports and accommodations for each ACT product. Any adjustment not listed in this guide is considered a modification and is not allowed on the test as it would invalidate what is being measured.

### Types of Accessibility Supports

Accessibility supports permitted during testing remove barriers and allow examinees access to the test while honoring the content the tests measure. It is important to abide by all outlined requirements for administering supports.

The four available types of accessibility supports for use in WorkKeys assessments are as follows:

- **Universal supports**
- **Designated supports**
- **EL supports**
- **Accommodations**

<table>
<thead>
<tr>
<th>Accessibility Supports</th>
<th>Specific Supports</th>
</tr>
</thead>
</table>
| **Hearing impairment** | • Sign language interpreter for verbal instructions  
• Printed copy of verbal instructions (for the examinee to read)  
• Preferential seating  
• Hearing assistive technology (audio amplification, FM/DM system) |
| **Learning disability** | • Human reader  
• Text-to-speech software  
• Pre-recorded audio (URL)  
• Extra testing time  
• Scribe (to mark or enter responses) |
| **Physical disability** | • Extra testing time  
• Breaks as needed (stop-the-clock breaks)  
• Scribe (to mark or enter responses)  
• Medical monitoring device (not physically attached to the examinee)  
• Adaptive device/technology (e.g., adaptive seating) |
Universal Supports

A universal, or embedded, support is an aid made available to all examinees to foster greater inclusion in the standardized test. Universal supports are embedded into testing practices.

Common universal supports appear in the tables found in Defining and Applying Accessibility Supports. Examples of universal supports include, but are not limited to, the following:

- Test booklet used as scratch paper
- Working on scratch paper (provided in the testing room)
- Standard calculator for Applied Math
- General administration directions repeated if requested
- Asking for clarification of verbal instructions
- Marking items for review

Designated Supports

Designated supports are available to any examinee for whom a need has been identified and are approved by the test coordinator. Districts, schools, and administrative agencies have the authority to provide designated supports listed in this guide for any examinee if test security is not compromised and testing environment requirements are met. Generally, most examinees are tested with their peers; however, under certain circumstances, a change in testing conditions may be necessary for an examinee. Typically, these are adjustments to the testing environment. Most require advance planning to deliver.

All allowable designated supports appear in the tables found in Defining and Applying Accessibility Supports. Examples of designated supports include, but are not limited to, the following:

- Assistive devices/technology
- Food, drink, and medication for examinees with medical needs (does not include medical monitoring devices)
- Frequent breaks that do not stop the testing clock
- Noise buffers/ear plugs
- Permission to stand during testing
- Time remaining indicator
- Service animal
- Small group/one-to-one testing

English Learner Supports

EL supports are available only for examinees enrolled in a school or homeschool within the United States or US territories who are not proficient in English. Educational teams that are responsible for selecting supports needed to access curriculum, instruction, and assessments due to limited English proficiency should identify needed EL supports.

EL supports appear in the tables found in Defining and Applying Accessibility Supports and are limited to the following provisions:

- ACT-authorized word-to-word bilingual dictionary/glossary
- Translated test directions, provided by ACT on your program’s ACT-hosted webpage
- Translated verbal instructions, provided locally
- One and one-half time
• Small-group testing

NOTE To request a review of a bilingual word-to-word dictionary not on the authorized list, send an email request to ACT at ACTAccom@act.org. ACT reviews the request and determines if the dictionary or glossary may be used. The requester receives an email indicating if the requested book is authorized for use. Include the following information in the email:

- Exact title of the dictionary/glossary
- ISBN identifier (both 10- and 13-digit number)
- Publisher
- Publication year
- Author, if applicable

Accommodations

Accommodations are authorized adaptations to the standardized testing procedures intended to reduce and/or eliminate the effects of an examinee’s disability. They should never reduce learning expectations by reducing the scope, complexity, or rigor of a test.

Accommodations are available only for examinees with disabilities as documented in an IEP, 504 plan, or similar accommodations plan and/or other documentation that substantiates a disability, as defined by the ADA. Accommodations provided for the test should be used regularly in the academic environment; they should not be introduced just prior to taking the test. Not all instructional accommodations are allowable for use on the test as they may change what the test is designed to measure. There are consequences for the use of non-allowable and/or non-authorized accommodations during the test.

NOTE Test coordinators may void a test if an examinee uses a non-allowable accommodation during testing.

All allowable accommodations appear in the tables found in Defining and Applying Accessibility Supports. Examples of accommodations include, but are not limited to, the following:

- Presentation and formats supports (e.g., alternate formats, assistive technology, auditory presentation)
- Response and navigation supports (e.g., assistive technology, scribe)
- Setting and location supports (e.g., preferential seating, small group, adaptive furniture)
- Timing supports (e.g., extra testing time, breaks as needed)

NOTE Students with an impairment that generally lasts less than 6 months may be afforded and use a designated support if a temporary need is identified.

Authorizing Accessibility Supports

The test accommodations coordinator (TAC) identifies and authorizes examinees to test with the following:

- EL supports based on limited English proficiency
- Accommodations based on the examinee's formal educational plan
- Designated supports based on an identified need

The test coordinator is ultimately responsible for authorizing accommodations and EL supports, and anyone authorized to approve accommodations is referred to as a TAC. The same person may
serve in both roles; however, ACT recommends all testing organizations identify two TACs. The TAC may assist with activities around administering test accessibility supports.

**Understanding Accessibility Supports Options**

ACT has developed a comprehensive list of available accessibility supports and accommodations designed to increase access to WorkKeys assessments and still result in valid, comparable assessment scores, as shown in the tables that follow. They provide helpful guidance for choosing appropriate accessibility supports, give an at-a-glance comparison of the available accessibility supports, and allow you to quickly identify what needs to be authorized.

Most materials needed for accessibility supports are provided locally or by the examinee. ACT provides the following:

- Large print test booklets and answer documents
- Pre-recorded audio (URL)
- Reader's scripts

**Defining and Applying Accessibility Supports**

The following tables list accessibility supports and accommodations available for use on WorkKeys assessments; describe what each support or accommodation is and who it’s for; provide notes on its application or use in the testing environment; and identify the type (TAC-authorized accommodation, designated support, EL support, or universal support) and testing mode (paper or online) for which it is available. The tables are divided into the following four categories:

- **Presentation & formats supports** (e.g., alternate formats, assistive technology, auditory presentation), which address the way information is presented or formatted
- **Response & navigation supports** (e.g., assistive technology, scribe), which address the way an examinee navigates the assessment or responds to test items
- **Setting & location supports** (e.g., preferential seating, small group, adaptive furniture), which address the characteristics of the setting or the location where the assessment is administered
- **Timing supports** (e.g., extra testing time, breaks as needed), which address the scheduling of and timing allowed for the test administration

Accommodations, designated supports, and EL supports used with required TAC approval as well as embedded universal supports and combinations of the accessibility supports listed in this table will result in a reportable score, which may be used towards earning a National Career Readiness Certificate (NCRC). Accessibility supports used without required approval, or other tools not listed here (i.e., modifications that are not allowed/not authorized), will result in a nonreportable score.

**NOTE** Key to abbreviations:

- A = TAC–authorized accommodation
- DS = designated support
- EL = English learner support
- U = universal support
- NA = not applicable
<table>
<thead>
<tr>
<th>Accessibility Support Name</th>

<th>Notes</th>
<th>Paper</th>
<th>Online</th>
</tr>
</thead>
</table>
| Background music/white noise machine                           | Instrumental music or white noise played aloud in the test environment intended as an unobtrusive accompaniment to the test administration.                                                                 | • Examinees diagnosed with anxiety who use music as a therapeutic tool                                                                                                                                                                                                                                                                                                                                 | • All examinees in the test environment must be authorized for background music, or one-to-one administration (individual test room) is required.  
• Individual music player with headphones is not allowed.                                                                                                                                                                                                                                                                                                           | DS    | DS     |
| Bilingual word-to-word dictionary (ACT-authorized)             | A reference source in print containing words in English, and the equivalent word in another language.                                                                                                                                                         | • Examinees who are not proficient in English, but have sufficient English to use the support effectively                                                                                                                                                                                                                                                                                               | One and one-half time should be authorized to use with this support.  
• Only ACT-authorized bilingual dictionaries may be used.                                                                                                                                                                                                                                                                                                              | EL    | EL     |
| Braille (see also tactile graphics)                            | A form of written language in which characters are represented by patterns of raised dots that are felt with the fingertips.  
• Unified English Braille (UEB) is used internationally for English Braille. UEB has its own mathematics and science notation but may also be used in conjunction with Nemeth.  
• Nemeth is a code developed in the United States for mathematics and science notation. | • Examinees with visual impairments, including blindness, who are proficient in reading braille  
• The braille code read by the examinee must be ordered.  
• ACT offers two contracted braille code options:  
  o UEB math/science  
  o UEB with Nemeth  
• ACT no longer offers English Braille American Edition (EBAE).  
• It is critical that the TAC requests the correct braille code for the examinee. Incorrect braille code tests will not allow the examinee to read the test.  
• If multiple braille codes are ordered, UEB math/science will be provided.  
• Braille test books include embedded tactile graphics for Applied Math.  
• Examinees authorized for braille are provided triple time.                                                                                                                                                                                                                                         | A     | NA     |
| Color contrast/color overlay                                   | Ability to adjust the contrast between the background and text.                                                                                                                                                                                                  | • Examinees with visual impairments  
• Examinees who experience eye fatigue when reading  
• Overlays provided by examinee must be inspected prior to testing and post testing to ensure                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                         | DS    | U      |
| Human reader who reads the entire test | Test booklets and answer documents printed in 18-point font, instead of the standard 10-point font. | • Examinees with a learning disability in reading decoding or comprehension | • Examinees authorized for a human reader are also assigned triple time (extra testing time), as that is the length of time required to orally present the test. | A | NA |
| Large-print materials | Test booklets and answer documents printed in 18-point font, instead of the standard 10-point font. | • Examinees with visual impairments | • Responses on the large-print answer document must be transcribed by the TAC to a standard print answer document in the presence of the examinee, unless the examinee declines to be present. | A | NA |
| Magnification device/zoom | Zoom: Enlarging the screen display using keyboard shortcuts (e.g., Ctrl +). Magnification: Enlarging a section | • Examinees with visual impairments | • Examinees should be seated so other examinees in test room cannot see the enlarged text or screen. • When using zoom, examinees may need to scroll to view all text and graphics. | DS | U |
| **CCTV** | Enlarging the test booklet using a closed-circuit TV/video magnifier.  
Magnifier: Enlarging printed text and graphics using a hand-held device (e.g., a magnifying glass or full-page magnifier). | Content can be shown through the CCTV but cannot be recorded. |
|---|---|---|
| **Pre-recorded audio** | Recording of the reader’s script provided by ACT.  
• Examinees with a learning disability in reading decoding or comprehension  
• Pre-recorded audio may be used in a group setting if each examinee has headphones and can advance through the test independently.  
• Audio is made available through an internet link from ACT. |  
| **Printed copy of verbal instructions** | Examinees are provided a printed copy of the verbal instructions locally.  
• Examinees who have difficulty following the verbal instructions  
• Examinees with a hearing impairment who need to follow along with what is being said by the room supervisor |  
| **Read aloud to self** | The examinee reads test items and/or answers aloud in an individual setting.  
• Examinees with a learning disability in reading decoding or comprehension |  
| **Screen reader software (JAWS, NVDA)** | Software that allows examinees with visual impairments to navigate and interact with the ACT test. Screen readers provide access via a speech synthesizer or braille display to on-screen text,  
• Examinees with visual impairments, including blindness |  
| | |  
| | Currently, only JAWS (Job Access With Speech) and NVDA (NonVisual Desktop Access) screen reader software are compatible. |
| **Sign language interpreter, for the entire test** | A qualified individual who visually translates test directions, test items, and multiple-choice responses using the reader’s script for the examinee. | • Examinees with a hearing impairment who use sign language as their primary mode of communication | • Examinee must be seated so they have clear access to view the interpreter.  
• The entire test, the interpreter follows the reader’s script verbatim, without adding explanation, using American Sign Language (ASL), Signing Exact English (SEE), or cued speech.  
• This requires the interpreter to sign an agreement on test day.  
• ASL is not a word-for-word translation, but rather an interpretation of the text. If there is a difference between the signed and written text, the written text supersedes the signed text.  
• Requires one-to-one administration (individual test room).  
• See Administration Instructions for Human Reader or Sign Language Interpreter for administration instructions. | A | A |
| **Sign language interpreter, for verbal instructions** | A qualified individual who visually translates verbal instructions for one or more examinees in the same testing environment. | • Examinees with a hearing impairment who use sign language as their primary mode of communication | • Examinee must be seated so they have clear access to view the interpreter.  
• One interpreter may sign verbal instructions to multiple authorized examinees who are seated in the same room and use the same sign language.  
• Verbal instructions may be translated into ASL, SEE, Conceptually Accurate Signed English (CASE), or cued speech. | DS | DS |
| **Tactile graphics, stand alone (see also braille)** | Palpable representation of non-textual information for examinees who are blind or visually impaired. Graphics for braille are called tactile graphics or raised line drawings. Charts, graphs, maps, diagrams, models, and symbols are translated into tactile graphics using multiple line heights, dashes, and textures to be felt by the fingertips. | • Examinees with visual impairments, including blindness, who are proficient in reading braille | • Examinees are able to feel raised lines and surfaces to obtain the same information that people who are sighted get through visual images. | Tactile graphics are only available for the Applied Math test. | ACT offers two stand-alone tactile graphics options:  
○ UEB math/science  
○ UEB with Nemeth  
• The braille code read by the examinee must be ordered.  
• All examinees with visual impairments who are using prerecorded audio or a human reader will need to use a companion paper form with braille and tactile graphics as critical interpretive information within math and science graphics may not be read aloud.  
• Tactile graphics often use labels to assist in understanding the tactile representation. The braille code read by the examinee must be ordered.  
• Tactile graphics are used in conjunction with prerecorded audio or a human reader for paper testing.  
• Braille test booklets have tactile graphics embedded. | A | NA |
<p>| <strong>Text-to-speech reader</strong> | An embedded, online, auditory presentation | • Examinees with a learning disability in reading | • This auditory presentation of the assessment replaces the | | | NA | A |</p>

used to cover portions of the test booklet and/or answer document.

### Answer eliminator
- The examinee crosses out multiple-choice answers to help determine the correct response.
- Examinees who use similar strategies during instruction
- Examinees use a system tool to cross out answers for online testing.
- Examinees cross out responses in the test booklet for paper testing; ACT will only score answers on the answer document.

### Brailled response
- Specialized tools that allow examinees to produce braille responses.
  - Brailled response
    - Braille writer: Assistive technology featuring six keys that correspond to each of the six dots of the braille code. Like a manual typewriter, paper is inserted into the machine. Typing causes raised braille dots on the paper, which can be read with the fingers.
    - Braille notetaker: Portable device with built-in refreshable braille display that may connect to the internet and has other software applications.
- Examinees with visual impairments, including blindness, who are proficient in writing braille
- Refreshable braille devices/notetakers must be disconnected from the internet and set to operate in dumb terminal mode.
- Responses in braille for paper-based testing must be transcribed to be scored. Transcription is completed by the TAC or someone proficient in braille authorized by the TAC (e.g., a teacher of the visually impaired [TVI]) in the presence of the examinee, unless the examinee declines to be present.
- Responses must be reproduced exactly as provided by the examinee.
- Examinees using a braille device can enter their responses directly into the testing platform.
- The TAC must delete the essay from the braille writer or computer used by the examinee and the transcriber (including the trash folder).
- Examinees authorized for brailled response are provided triple time.

### Mark answers in the test booklet (no scantron)
- Examinee indicates their responses in the test booklet or on a separate piece of scratch paper rather than the
- Examinees with impairments which impact their ability to use a scantron
- Responses are transcribed on the answer document or testing platform to be scored.
- Failure to transcribe responses to the answer

answer document or testing platform.  

- Examinees with fine motor control concerns  

- Document or testing platform will result in scores not being reported.  
  - Transcription is completed by the TAC in the presence of the examinee, unless the examinee declines to be present.

Transcription is completed by the TAC in the presence of the examinee, unless the examinee declines to be present.  

- Requires the scribe to sign an agreement on test day.  
- The scribe must be proficient in English.  
- A scribe should not be used based solely on difficulty in marking responses.  
- Use of a scribe to dictate responses is a skill that develops over time and an examinee should not use it for the first time during testing.  
- This must be a one-to-one administration (individual test room).  
- Use of a scribe will require extra testing time that must be authorized.  
- See Administration Instructions for Scribe for administration instructions.

A qualified individual marks responses for the examinee or types what the examinee says verbatim during testing.  

- Examinees with motor disabilities which impede their ability to independently write  

- Use of a scribe to dictate responses is a skill that develops over time and an examinee should not use it for the first time during testing.

</thead>
<tbody>
<tr>
<td>Medical monitoring device (not physically attached to the examinee)</td>
<td>Any device, instrument, apparatus, machine, appliance, or implant an examinee uses for a medical condition.</td>
<td>• Examinees with medical conditions which require a medical device • Medical devices that are physically attached to an examinee such as a continuous glucose monitor (CGM), hearing aide, cochlear implant, heart monitor, or insulin pump do not need to be approved for use. • If the allowable medical device makes noises or sounds an alarm which may disrupt other examinees in the test environment, a one-to-one administration (individual test room) should be provided. • Cell phones or other smart devices used to monitor medical conditions must be authorized in advance. Such use requires one-to-one administration (individual test room) in which the test proctor supervises the use of the otherwise prohibited device to ensure it is only used for its medical purpose.</td>
</tr>
<tr>
<td>Permission to stand during testing</td>
<td>Seating an examinee in a location which allows them to stand, walk, pace, or otherwise move and not distract other examinees.</td>
<td>• Examinees who need an environment that allows for movement. • This is typically provided as a one-to-one administration (individual test room).</td>
</tr>
<tr>
<td>Preferential seating</td>
<td>Allowing examinee a specific seat location (e.g., sitting in the front to see sign-language interpreter).</td>
<td>• Examinees with sensory concerns • Examinees who are easily distracted • Examinees with behaviors that may distract others</td>
</tr>
<tr>
<td>Service animal</td>
<td>An animal, typically a dog, trained to assist an individual who has a disability.</td>
<td>• Any examinee with a disability who has a trained service animal • The use of service animals is a protected right under the ADA. Service animals must be allowed in all areas of the test center</td>
</tr>
</tbody>
</table>
| Small group/one-to-one testing | Allowing the testing in a small group or one to one as an individual administration. | • Examinees with sensory concerns  
• Examinees who are easily distracted | • "Small group" is defined by the examinee's educational plan or state policy. ACT recommends that a small group be less than the number of examinees in a standard room, with a maximum of 20 examinees. | DS|EL | DS|EL |
| Time remaining indicator | Providing an alternate auditory or visual notification of time remaining, such as countdown timer, note cards with time remaining, or tap on shoulder. | • Examinees with a hearing or visual impairment  
• Examinees who require a visual representation of time remaining in a test session, such as examinees who are deaf | • The method of notification of time remaining should be determined in advance with the examinee.  
• Countdown timers are embedded on the online testing platform as a universal support. They show the time allowed for the test and count down when the test administration starts.  
• A visual five-minute warning is embedded in the online testing platform. | DS | DS |
| Visual environment | Adjusting the test environment based on identified examinee need. This may include, but is not limited to, minimizing visual clutter, brighter or dimmer lighting, or seating to minimize glare or increase natural light. | • Examinees with visual impairments  
• Examinees with migraines | • The environment should be adjusted in addition to the general preparation of a test room. | DS | DS |
| Wheelchair accessibility | Ensuring examinees who use a wheelchair are able to enter and exit the test facility and | • Examinees for whom walking is difficult or impossible due to illness, injury, or disability | • Table heights may need to be adjusted to accommodate the examinee. | DS | DS |
If the test environment is not on the main level, access to elevators or ramps must be available.

| Breaks, as needed                | Additional rests with the test time paused on top of breaks scheduled for all examinees. | • Examinees with medical conditions which require immediate response  
• Examinees with behavioral concerns which require sensory breaks for calming | • Examinees indicate when they need to take a break, and when they are ready to resume testing.  
• Examinees may not interact with other examinees when taking a break.  
• There is a 90-minute time limit inclusive of all breaks (including as-needed breaks and scheduled breaks between sections for all examinees).  
• No single break can exceed 59 minutes, and cumulative breaks during a single test section cannot exceed 59 minutes.  
• This must be a one-to-one administration (individual test room).
• Breaks must be supervised.
• Breaks may not be overnight. | A     | A      |
| Extended testing time            | Examinees are allowed additional time to complete testing (extra time) or administered sections of the test on different days (multiple-day testing). | • Examinees with a learning disability who require additional processing time  
• Examinees who use another accessibility support which requires additional time such as screen reader software or braille  
• Examinees with medical conditions which affect stamina | • Timing is part of test standardization. Providing extra time to examinees who do not require it to access the test may result in scores which are not representative of the examinee's skills.  
• Extra testing time options include one and one-half time, double time, and triple time.  
• Using extra time is a skill and should not be provided without prior | A|EL  | A|EL   |
### Test Administration Details

To administer tests to examinees with accessibility supports or accommodations, you'll need to understand details about preparing for testing and specific supports described in this section.

#### Facility Requirements

Under the ADA, tests must be offered in locations accessible to individuals with disabilities, or in rare cases, in accessible alternative locations.

<table>
<thead>
<tr>
<th>Time of day</th>
<th>Allowing examinees to test at a time other than the standard schedule (e.g., testing does not need to begin first thing in the morning).</th>
<th>Examinees who take medication that affects their ability to stay focused or causes drowsiness</th>
<th>Examinees should be reminded not to share test content with peers who are on a different test schedule to minimize exposure to secure test content.</th>
<th>DS</th>
<th>DS</th>
</tr>
</thead>
</table>
In addition to the general test room selection requirements described in the WorkKeys Administration Manual, the following considerations must be addressed when selecting test rooms for accessibility supports:

- Examinees with different timing must test in separate rooms.
- Examinees authorized to test with a human reader or breaks as needed require one-to-one administration (individual test room).
- Examinees using pre-recorded audio may test as a group if they use headphones, can control the progress of their own devices, and begin each test at the same time.
- ACT encourages group administrations for examinees authorized for the same accommodations and/or supports.
- ACT prefers classrooms and recommends no more than 20 examinees in one room.
- ACT recommends reserving the same room for each day you will be testing and scheduling consecutive days for examinees authorized to test over multiple days (although you may skip days as necessary).

Report of Accommodated Tests

For each accommodated test, the test coordinator should complete and submit a Report of Accommodated Tests, found in the ACT WorkKeys Administration Manual (paper testing) on your ACT-hosted state website or the ACT WorkKeys Administration webpage. This report lists each examinee's name, test site, administration code, accommodations, and evidence of qualifications for such accommodations.

NOTE If your program is part of ACT State testing for grades 9–12, this form does not need to be completed; however, it may help organize examinees using accommodations or supports.

No accommodations other than extended time and text-to-speech are currently available with online testing. If you have examinees that need other accommodations (e.g., a human reader), they must test using paper materials. For paper testing, use the report to organize and order appropriate accommodation materials for each examinee.

Timing Guidelines

All examinees in the room must have the same authorized timing. Examinees with the same testing time should test together as a group unless an accommodation requires one-to-one administration (individual test room). A timing chart is provided below.

NOTE When testing with accessibility supports, examinees may use less time than allowed with their authorized timing. Do not move to the next test until the standard time has expired and all examinees in the room have completed that test section or the allotted extended time has expired.
Timing for Tests

</tbody>
</table>

Testing More Than One Examinee at a Time

ACT requires group administrations for examinees with the same timing and similar accommodations and/or EL supports. If more than 20 examinees will test in one room, ACT requires a proctor to assist with the administration.

All examinees in the room must have the same authorized timing and must be working on the same content area at the same time (e.g., when administering Applied Math, all examinees must be working on Applied Math).

Examinees Who Test with a Service Animal

The use of service animals is a protected right under the ADA; therefore, an examinee may not be dismissed based on the need for a service animal. A service animal may provide services that include, but are not limited to, the following:

- Guiding examinees who are blind
- Alerting examinees who are deaf
- Pulling an examinee's wheelchair
- Alerting and protecting an examinee who is having a seizure
- Calming an examinee during an anxiety attack
- Preventing an examinee from engaging in self-injurious behavior
- Providing stability to an examinee with limited balance

Emotional support animals or therapy animals are not service animals according to the ADA and are not permitted in the testing environment.

Following are guidelines for testing examinees with a service animal:

- Service animals must be harnessed, leashed, or tethered, unless these devices interfere with the service animal's work or the examinee's disability prevents use of these devices.
that case, the examinee must maintain control of the animal through voice, signal, or other effective controls.

- Do not assign an examinee to one-to-one testing solely based on the presence of a service animal. If another examinee in the examinee's assigned testing room has a dog allergy or disabling phobia, the test coordinator should follow the ADA recommendation to accommodate both people by moving them to different locations within the room or different rooms in the facility.

- A service animal that poses a direct threat to others (e.g., biting), fundamentally alters the educational environment (e.g., barking), poses a direct threat to the health and safety of others (e.g., fleas or ticks), or is not housebroken is not covered under the ADA and may be excluded from the testing environment.

## Testing with Interpreters, Readers, or Scribes

**NOTE** Test scores achieved under the supervision of an individual who does not satisfy ALL the requirements listed in this section will be voided.

Any sign language interpreter, native language interpreter (for verbal instructions), reader, or scribe must meet the following criteria:

- Be proficient in English and, if applicable, the sign language system or the appropriate native language
- Be experienced in testing
- Be employed by the school district where the examinee will be taking the test. (This only applies if the examinee is taking the test at their school.)
- Agree to administer the tests in compliance with the policies and procedures in this manual.
- Read and sign the appropriate agreement:
  - ACT WorkKeys assessments Interpreter’s Agreement
  - ACT WorkKeys assessments Reader's Agreement
  - ACT WorkKeys assessments Scribe’s Agreement

**NOTE** These agreements can be found in the applicable *ACT WorkKeys Administration Manual* (online or paper testing) on the ACT-hosted state website or the [ACT WorkKeys Administration webpage](#).

To protect both the examinee and the sign language interpreter, native language interpreter (for verbal instructions), human reader, or scribe from questions of possible conflict of interest, the sign language interpreter, human reader, or scribe must not be:

- A relative or guardian of the examinee
- An individual engaged in test preparation activities for the test during the current academic year
- A private consultant or tutor whose fees are paid by the examinee or examinee’s family
- An individual involved in coaching high school or college athletics
- Receiving any compensation outside of ACT for administering the test

Examinees authorized for a sign language interpreter for test items, reader, or pre-recorded audio (URL) are also assigned triple time (extra testing time), as that is the length of time required to present the test.
Examinees may be authorized to test with a sign language interpreter, native language interpreter (for verbal instructions), reader, or scribe under the circumstances described in the following paragraphs. Administration instructions follow the authorization descriptions.

**Sign language interpreter**

- An interpreter may sign **verbal instructions**, if authorized by the test coordinator.
  - Sign systems for verbal instructions include any English-based sign system used widely in the U.S., including ASL, SEE, CASE, and cued speech.
  - When signing verbal instructions only, the administration does not need to be one-to-one administration (individual test room).
  - The interpreter must sign all questions from examinees and the room supervisor's responses.

- An interpreter may sign **test directions and test items** for paper testing, if authorized by the test coordinator.
  - Sign systems for test items include ASL, SEE, or cued speech following the reader's script. No other sign systems are allowed for test items.
  - An interpreter follows the reader script verbatim, without adding explanation. Refer to Administration Instructions for Human Reader or Sign Language Interpreter.
  - This must be a one-to-one administration (individual test room).

  **NOTE** ASL is not a word-for-word translation, but rather an interpretation of the text. If there is a difference between the signed and written text, the written text supersedes the signed text.

**Native language interpreter**

- An interpreter may translate **verbal instructions** into an examinee's native language, if authorized by the test coordinator.
  - When translating verbal instructions only, the administration does not need to be one-to-one.
  - The interpreter must translate all questions from examinees and the room supervisor's responses.

**Human reader**

- The test is administered as one-to-one testing. The reader may not read the test to a group.
- The reader follows the reader's script verbatim, without adding explanation. Refer to Administration Instructions for Human Reader or Sign Language Interpreter. The examinee may not indicate they only want occasional words or phrases read.
- Any portion of any test may be repeated at the examinee's request within the time allowed for that test.
- The examinee may indicate they do not want a portion of the test read, such as formulas for the mathematics assessment. An irregularity report must be completed if an examinee chooses to not have any portion of the tests read.
- If using tactile graphics, do not describe the graphics, attempt to interpret the graphics, provide information not in the graphics, or present the graphics in any other format.
NOTE The tactile graphics provided with the reader’s script for examinees with visual impairments or blind examinees are for examinee use only.

- If ACT determines that any explanation or additional information has been provided to the examinee, that any test materials were not read verbatim, or were read to a group of examinees the examinee's scores will be canceled.

NOTE All the test questions rely on the examinee being able to comprehend and respond to the test materials exactly as written. Any additional information, explanation, or translation would affect what the tests are designed to measure.

- The reader must sign a Reader’s Agreement affirming you have read, understand, and will abide by the procedures outlined in ACT documentation.

Scribe

- A scribe may be authorized for examinees who are unable to mark multiple-choice answers. Refer to Administration Instructions for Scribe.
- During the test, the examinee dictates answers to the scribe who marks responses.
- The scribe may not make any corrections not dictated by the examinee.
- The scribe may write down notes dictated by the examinee on the blank pages of the test booklet.
- The scribe may type on the calculator what the examinee dictates (math section only).
- The test is administered as one-to-one administration (individual test room).

Administration Instructions for Human Reader or Sign Language Interpreter

An examinee who is not able to read may require a human reader who uses a reader's script and, if needed, sign system (ASL, SEE, or CASE) to read the test directions, test questions, and answers for an examinee.

Following are instructions for use of a human reader or sign language interpreter. The word "read" should be interpreted to include signing in these instructions.

- You will read the entire test to one examinee using the reader’s script.
- The examinee must take the test alone in a separate room. They cannot take the test with a group.
- Before starting, you must verify the 3-character test form number on the front cover of the examinee’s test booklet matches the test form number on the reader’s script. Failure to match could cause an irregularity. If the codes do not match, call ACT immediately for instructions.
- You must read the directions, passages, and all the test questions from the script in English to the examinee.
- You must read exactly what is in the script (without changing words) in your normal voice, unless emphasis is indicated in the script.
- The examinee can ask you to read any part of the test again, but you cannot give explanations or extra information.
- The examinee can ask you to skip portions of test items, such as formulas for Applied Math, they would like to read themselves.
- Sign language interpreters must be cognizant when translating items that the sign does not lead or cue the examinee to a particular response or give unfair advantage or disadvantage to the student.
• Follow these guidelines for how to read the test:
  o After reading the question number, pause before reading the question.
  o Emphasize words or phrases that are italicized. Also, emphasize only the words "NOT," "EXCEPT," "MOST,"" and "LEAST" printed in all capital letters. Do not emphasize other words printed in all capital letters.
  o Read only quotation marks ["] and parentheses [(/)] out loud, which should be read as "quote," "end quote," "open parenthesis," and "close parenthesis." Other punctuation, such as periods [.], commas [,], exclamation marks [!], brackets [ / ]], etc., is not read aloud unless specifically indicated in the script.
  o Read punctuation spelled out in capital letters in the script (e.g., COMMA). This occurs in items where grammar is being assessed.
  o Words with slashes [/] on either end don't need to be emphasized nor read as "slash."
  o Some sentences on the test have bad grammar on purpose. Read these sentences smoothly to avoid giving the examinee any hints.
  o On the English test, spell out words that have the same sound but are spelled differently (i.e., homonyms).
  o Read the letters of acronyms separately when it is not pronounceable as a word (e.g., C-I-A or N-I-H or F-B-I).
  o Read acronyms that are pronounceable as a word as the word (e.g., UNESCO or NATO).
  o Read numbers using proper place or class values. Read dates as two numbers (except for the first 10 years of a century). For example:
    ▪ For 108, say "one hundred eight" NOT "one-oh-eight"
    ▪ For 2334, say "two thousand three hundred thirty-four" NOT "twenty-three hundred and thirty-four"
    ▪ For years like 1046, say "ten forty-six"; for decades like 1840s, say "eighteen forties"
  o On the Applied Math test, zero is always spelled in the reader's script. An O on the Applied Math test is not the number zero; it is the letter "o".
  o The letter "l" and the number "1" look similar. On the reader's script, the letter "l" is written phonetically as "el". Say "el" when you see it.

NOTE If you do not follow these instructions and guidelines, the test coordinator may void the test and the examinee will not receive their test scores from ACT.

Administration Instructions for Scribe
An examinee who is not able to write may require a scribe who can handwrite or type the answers for the examinee.

Following are instructions for use of a scribe:

• You may scribe for only one examinee individually in a separate room. The examinee cannot take the test with a group.
• You must answer exactly as the examinee tells you.
• If the examinee requests you to write down any notes or outlines, you may do so in the test booklet, but the examinee is responsible for indicating what is and is not part of their final answer.
• Do not make any corrections not dictated to you by the examinee.
• At any time before “STOP” is called, the examinee may review what you have written by asking to read it. If the examinee is visually impaired or has a human reader, you may read what you have written to the examinee verbatim, with no changes, inflections, or pauses that would alert the examinee to any mistakes.

Testing with Text-to-Speech or Pre-Recorded Audio

Examinees authorized for TTS or pre-recorded audio (URL) may test as a group if they have their own headphones, can control the progress of their own device, and work on the same test at the same time (e.g., when administering Applied Math, all examinees in the room must be working on Applied Math).

Examinees authorized for testing with TTS or pre-recorded audio are also assigned triple time (extra testing time), as that is the length of time required to present the test. Examinees may replay any portion of any test as needed within the time allowed for each test. For testing with pre-recorded audio (URL), each examinee should also be given a regular print test booklet to follow along.

The pre-recorded audio kit includes Pre-Recorded Audio Guidelines, an accommodations test booklet to match the pre-recorded audio, and an answer document. Conduct a practice session with the examinee using the practice test information available in the Pre-Recorded Audio Guidelines shipped to your site when you ordered audio.

Testing with Screen Reader Software

Screen reader software helps examinees with visual disabilities including blindness access printed text. It converts text, buttons, images, and other screen elements into speech or braille. It also has on-screen zoom magnification features. Screen reader software differs from TTS software and pre-recorded audio (URL) as it not only reads the entire test aloud to the student, but it provides screen orientation and navigation. Screen reader software should be requested only for an examinee who is familiar with and knows how to use a screen reader.

Typically, screen readers are used exclusively by students who are blind. If a student has not used a screen reader before, it will be quite difficult for them to use and navigate because it requires use of keyboard shortcuts which are not intuitive for those who are unfamiliar with the software. Examinees who simply require the test to be read aloud should request TTS software or pre-recorded audio (URL).

For test administration via screen reader, the TAC will access the test via the online test platform and the student will test exclusively on the computer. ACT currently only supports administration of the test via JAWS or NVDA software, which must be provided locally by the test center. Instructions for accessing the online testing platform will be sent out in advance via email to the person listed on the screen reader fulfillment form.

Examinees authorized for testing with screen reader software are also assigned triple time (extra testing time), as that is the length of time required to present the test. Examinees may replay any portion of any test as needed within the time allowed for each test. ACT will send supplemental paper materials out for the examinee’s use (which includes braille).

A practice test is available to allow examinees an opportunity to experience how their screen reader software will interact with the testing platform and help ensure any needed software
features are active prior to the actual test day. Use the Practice Test Instructions: Online Testing to create an account and register for a practice test.

For More Information

ACT is committed to making the WorkKeys assessments accessible for all examinees. If you still have questions about accessibility supports after reading this guide, call us at 800.967.5539, or contact us at workkeys@act.org.
