Encourage your students to use ACT® Academy™ to take steps toward a strong ACT test score.

- **It’s free for every student!**
  Having an account allows your students to track their progress and keep moving forward.

- **Create a playlist: Take a quiz or enter a score.**
  Short quizzes identify what students have mastered and areas of growth. Enter ACT or PreACT scores and custom playlists will be automatically created!

- **Watch and learn.**
  Automated daily playlists hit on the basic lessons your students need to master the ACT. After each lesson, a short quiz will determine if the resources helped them learn the material.
The amount of merit awards offered were more than 3 times higher for students who took the ACT compared to those who took the SAT over 4 years of college.

ACT customers are all about outcomes. Ultimately, the dedication to student success is the common thread that links ACT and all of the teachers, counselors, administrators, parents, students, test administrators, and others in various student support roles.

Why choose ACT? Because, like you, we are dedicated to education and career success—it’s why we exist. What’s important to you is important to us.

Measuring Success Is in ACT’s DNA
ACT scores predict important college outcomes. The ACT® has more predictive evidence than any other assessment program, linking ACT scores to students’ performance in the first year of college through college completion.

Our focus on outcomes runs deep. It is, in fact, our mission to help people achieve education and workplace success.

The ACT Measures What Matters
It’s the link between high school curriculum and college performance.

The ACT assesses the skills students should be learning every day. We use a dual validity loop and our National Curriculum Survey to continually ensure alignment among:
- What schools teach
- What we measure
- Student performance in college courses

This unique approach is one of the many reasons we don’t need to make radical changes to our test.

More Students with ACT Scores Get into College
The ACT is the most used predictor of college performance and has become the universal language of readiness. You probably know that the ACT is accepted by all US colleges and universities, but these numbers may surprise you:
- 133 US colleges and universities receive at least 20,000 ACT scores every year
- The top 16 institutions collectively receive more than 1 million ACT scores per year
- One university alone receives more than 90,000 ACT scores per year

In corresponding credit-bearing first year college courses

50% Chance of earning a B or higher
75% Chance of earning a C or higher

The College Entrance Exam that Supports English Learners
ACT provides accommodations to U.S. students who are English learners. The goal of these supports is to help ensure that the ACT scores earned by EL students accurately reflects what they have learned in school. Most importantly, test results are college reportable. Accommodations include:
- Bilingual dictionary
- Directions in 12 languages
- Small group testing
- Non-distracting environment
- Extended testing time

A school counselor at Morse High School in Maine documented over 10 years of her students taking both the ACT and SAT and found more scholarships favored the ACT. See the full story at act.org/milliondollarimpact

“Students may be missing out on more scholarship opportunities—and, possibly, college altogether—by not taking the ACT.”

Leslie Trundy, School Counselor, Morse High School

“One of the reasons I don’t pay much attention to SAT is I don’t know what their scores mean. The thing I like about ACT: At our school we don’t focus a lot on scores—we focus a lot more on benchmarks because we can tell what that means.”

Alan Shotts, Career Center Coordinator at Cody High School in Wyoming
