

Overview

In this document, you'll find information on the following:

- Purpose of state use questions
- How to collect information
- Reading questions to examinees

Note: In addition to procedures provided in the administration manual(s), follow these directions to accurately report scores to the examinee, school, and/or for accountability purposes.

Incorrect information may prevent examinees from receiving scholarship opportunities.

Purpose of State Use Questions

The Wyoming Department of Education has requested that additional information be reported by examinees, in addition to the information provided in the Student Data Upload (SDU) file.

This information is used for any of the following reasons:

- Information about examinees
- Potential scholarship data
- Examinees who do not test

How to Collect Information

For paper testing: After examinees complete Blocks N through R, staff reads the state use questions listed in the [Reading State Use Questions to Examinees](#) section of this document. Examinees provide a response to questions in Block V (School Use Only—State Questions) on their answer document.

This is completed through an in-school session prior to test day.

For online testing: The room supervisor reads the state use questions listed in the [Reading State Use Questions to Examinees](#) section of this document when examinees are on the School Use Only – State Questions screen in TestNav™.

Examinees enter identifying information, agree to terms and conditions, and answer State Use Questions in TestNav immediately before the timed test.

Refer to the appropriate verbal instructions in the administration manual.

Reading State Use Questions to Examinees

The room supervisor reads the questions aloud to examinees verbatim:

- as part of the scheduled non-test session for paper testing
- immediately before the timed test for online testing

All questions should be answered only by the examinees. They are to select only one response for each question.

State Use Questions

#	Question	Response
