

Help Students Succeed Before and Beyond University

Each year, millions of high school students in grades 11 and 12 take the ACT[®] test to gain insights into their university and career readiness. PreACT[®], targeted to grade 10, gives students practice with the ACT and empowers them, their parents, and educators with these valuable insights even sooner.

PreACT provides:

- **Early indication of progress and ideas for improvement**—PreACT gives students an estimated ACT test score and can be used as an indicator of university and career readiness. Reports include data to help educators and counselors target interventions, inform classroom instruction, and guide students in course selection.
- **Fast, robust reporting**—Reports are ready quickly, so educators and students can get to work turning PreACT insights into action. Reports include information about student interests that counselors can use to advise students in thinking about university majors and careers.
- **Easy, flexible, and affordable administration**—PreACT encompasses paper-based, multiple-choice tests in English, math, reading, and science. PreACT can be administered on any date between September 1 and June 1, making it a flexible and affordable way to give students low-stakes practice in a high-stakes environment.

Opening Doors to Opportunities

Students may opt to have their information shared with universities and scholarship agencies when they take PreACT, providing greater opportunities for recruitment and scholarship awards.

The choices a student makes in high school help **chart a course for life**. Educators can use insights from PreACT report data to **help students prepare for success**—and start making informed choices well before graduation.

Practice with the ACT Test Experience

PreACT provides students with a structured testing environment similar to what they will experience when taking the ACT: ACT test-quality questions, and predictive scores on the familiar 1–36 scale. This helps students get comfortable with the test and understand how they’re doing in core subjects. It also helps parents and educators identify areas where additional support might be necessary.

PRACTICE GETS PERSONAL ON **ACT ACADEMY**

ACT® Academy™ is a free online learning tool and test practice program designed to help students get the best score possible on the ACT test.

Students can plug in their PreACT scores and get their own personal path for improvement at their own pace. It’s an engaging (and free!) way for students to improve their chance for success.

More Than a Score

Report data can help guide **action plans for students to increase success** in high school courses and on the ACT. Students also receive a personalized view of university and career possibilities—based on their answers to the ACT Interest Inventory—which can help them start thinking about career paths. Parents and counselors can use the data to help students choose high school courses most relevant to career areas of interest.

Meaningful to Educators

Educators quickly receive PreACT reports to evaluate individual student data and patterns of performance across content areas. PreACT enables counselors to have earlier and more informed conversations with students about topics such as course selection, career plans, postsecondary options, and potential scholarships.

Additionally, educators can implement a **personalized blended learning environment** with ACT Academy, a standards-aligned resource library with over 500,000 of the best educational videos, games, assessments, homework assignments, and lesson plans—all in one place.

School Benefits

PreACT data can help support strategic conversations and facilitate a deeper understanding of overall student progress. PreACT provides a flexible administration during the school year. ACT will provide training and resources to help educators administer PreACT and better understand reports.

Use PreACT to help your students practice for the ACT, discover new opportunities, and start planning for the future. Learn more at global.act.org/preact.
